

The comprehensive FloShield continuous vision system, available in both traditional and robotic assisted laparoscopic versions, is built around two cutting edge technologies:

Vortex Barrier Technology[™]

Instantly defogs the lens while continually shielding it from debris and smoke throughout the entire surgical procedure.

Flo-X[™] *in situ*

Rapidly flushes the lens on demand, without having to remove the scope.

Maximize Clarity. Minimize Interruptions.

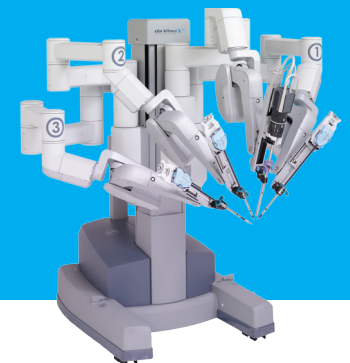

Traditional

5 mm and 10 mm | 0°, 30° and 45°

Robotic

8.5 mm | 0° and 30° down

ORDERING INFORMATION FOR FLOSHIELD 5 MM STANDARD LENGTH

Scope Brand	Scope Angle	Units/Case	FloShield Air Cat. #	FloShield Plus Cat. #
Storz/Olympus	0°	6	FSS 01 0500T *	FSS 01 0500U **
